

DIAGONAL MIRROR CLEANING

This diagonal has a high efficiency mirror which requires special handling. Scratches happen when dust or other abrasive particles are on the mirror and are wiped across the surface during cleaning. Clean mirror ONLY when absolutely necessary.

- 1) Remove dust, dirt, grease, etc., from the mirror surface. Use rubber ear syringe (purchased at any drug store) to blow off loose contaminants.
- 2) Make a pad with lens cleaning tissue (such as Kimwipes®), moisten it with fresh isopropyl alcohol (90% or better) or Methanol to wash off grease. Gently wipe across mirror surface using only the weight of the pad. Do not rub, this will scratch the mirror. Do not touch the metal parts.
- 3) Slight residual stains or dust spots will have absolutely no visible effects in observing.

CAUTION: Do not clean mirror with water or water-based cleaners such as Windex® or any other commercial lens cleaners. This is not a lens. All contain too much water and will leave residue.
