

(BPL-1098) GIBRALTAR 5 Mounting Plate Instructions

The Gibraltar 5 Mounting Plate was originally developed and included for use with our 5" Mount Ring Set, however it can be used to attach any Tele Vue telescope equipped with either a Tele Vue Ring Mount, Tube Rings or Dovetail to a variety of mounts or mounting adapter plates.

- A. Holes - These accept the mount ring studs and guide pin studs as shown in the scope cutaway diagram above.
- B. Holes - For use with the Tele Vue Gibraltar-5 Head. (Mounting instructions will come with the Gibraltar5)
- C. Holes - For use with other Tele Vue Ring Mounts. (By using longer than normal studs, other Tele Vue scopes can conveniently be attached to the Gibraltar5 Head without removal of the Mounting Plate.)
- D. Tapped Holes - For use with the Tele Vue's Vixen Mount Adapter plate (AVT-1011) adapters for attachment to Vixen mounts.
- E. Tapped Holes - Use with Vixen AM-AD-2576 accessory plate. The Vixen plate allows an NP127 and guide scope to mount side by side.
