0.8x Reducer/Flattener for 102 Scopes (RFL-4087)

This 0.8x reducer can be used for all Tele Vue 102mm f/8.6 telescopes (TV102 or TV102is) and other telescopes in the 800-1000mm focal length range for increasing field size and flattening the field for up to 35mm sensor format.

The optimal back focus distance from the rear, flat flange of the RFL-4087 to the camera image sensor is 60.98mm. For DSLR or mirrorless camera bodies that accept T-Rings, this distance is easily achieved by attaching a Tele Vue Imaging System T adapter to the RFL-4087: CWT-2070 for Canon EOS or NWT-2073 for Nikon F, or our TRG-1072 Standard T-Ring Adapter followed by the T-Ring for the camera.

You must attach Tele Vue RAD-1074 (Imaging System to 2" Focuser) adapter to use on 2" focusers. (The RFL-4087 together with RAD-1074 comprises a replacement for the previous REF-3007). For the Tele Vue TV102is, the front female threads accept Tele Vue Imaging System threaded extension tubes TLA-0250, TLB-0375, TLC-0500, & TLD-1000, as necessary to reach focus.

	Without RFL-4087 (Recommended up to 20mm field diam.)	With RFL-4087
TV102 Focal Length	880mm	704mm
f/# (ratio)	8.6	6.9
Field of View (deg)	1.3 (20mm field dia.)	3.4 (42mm field dia.)

TRG-1072 / CWT-2070 / NWT-2073

RFL-4087

RAD-1074
