

GREAT ACCESSORY: EYEPIECE CADDY SET

Part Numbers

Eyeiece Caddy Set (TEC-1018)

Sky Tour Caddy Plate (SCP-1019)

INTRODUCTION

This versatile accessory attaches to the yoke arms of your Tele Vue mount and places five eyepieces conveniently at your fingertips. The Caddy Set is precision machined aluminum, and powder-coated for lifetime durability. It's a *must have* item for Tele-Pod owners.

Also available is a plate to attach the Sky Tour display unit. This plate will mount to either Caddy, using the available clearance holes.

INSTALLATION

The most current yoke and cradle heads have the attachment holes already drilled into the arms. Attach each Caddy bracket by passing the screws through the clearance holes in the yoke arms and fixing the wing knob tight.

The angled edge will match the arms, so that when viewing from the telescope eyepiece position, the (3) 1 ¼" holes will be on the left side, while the (2) 2" holes with removable 1 ¼" plastic plugs will be to your right.

USE

You can place up to (5) 1 ¼" eyepieces in the Caddy Set, or by removing the plastic inserts, use (3) 1 ¼" and (2) 2" eyepieces. To remove the 1 ¼" inserts, push up from the bottom. To reinstall the 1 ¼" inserts, push them in from the top by running your thumbs around the outer lip. They will snap into place.

If you have dual barrel eyepieces you can use either 1 ¼" or 2" holes, but the outside lock screw in the 2" eyepiece barrel must be removed.

Of course, your Barlow or Powermate units, or 2" to 1 ¼" adapters can also be placed in the Caddy Set.

Optional Sky Tour Caddy Plate

The optional Sky Tour Caddy Plate conveniently locates the Sky Tour control display unit at your fingertips. It attaches to either the left or right eyepiece caddy, allowing the Sky Tour to rotate with the mount.
